SPRINT OPS CENTER

The Execution Intelligence Layer for Jira Cloud

> See sprint risks before they become delivery failures.

Sprint Ops Center is a native Jira Cloud app built on Atlassian Forge that gives Agile teams real-time visibility into sprint execution. Instead of waiting until stand-ups, reviews, or retrospectives to discover issues, it helps teams identify blockers, workload imbalances, aging issues, and dependencies while there's still time to act.

Everything You Need. One Operational Cockpit.

Sprint Ops Center consolidates critical execution signals into one unified dashboard so your team can focus on delivery instead of manual tracking.

KEY CAPABILITIES

- Unified Sprint Health Dashboard
- Team Workload & Bottleneck Analysis
- Automatic Aging Issue Detection
- One-Click Sprint Review Snapshot
- Blocker & Dependency Tracking
- Real-Time Execution Monitoring

Move beyond tracking. Start orchestrating.

The Problem

Most Agile teams are good with planning, but struggle with execution.

Despite meticulous sprint planning, deliveryrisks often remain hidden until it's too late.

- Blockers surface midway through the sprint
- Aging issues quietly accumulate
- Team workload becomes uneven
- Dependencies emerge during sprint reviews
- Spillovers become the new normal

Why Teams Choose Sprint Ops Center

Reduce Manual Status Tracking

Spend less time chasing updates and more time resolving issues.

Increase Operational Visibility

A single source of truth for sprint execution.

Improve Delivery Confidence

Identify risks early and make proactive decisions.

Native, Secure & Scalable

Built on Atlassian Forge and aligned with Jira Cloud security standards.

Move beyond tracking. Start orchestrating.

Why Sprint Ops Center?

Real-Time Sprint Visibility

Know the health of every active sprint at a glance.

Early Risk Detection

Automatically detect blockers, dependencies, aging issues, and bottlenecks before they impact delivery.

Predictable Sprint Outcomes

Reduce sprint spillovers and improve delivery commitments.

Built for Jira Cloud

Native Atlassian Forge application designed exclusively for Jira.

Built for

- Scrum Masters
- Delivery Managers
- Engineering Managers
- PMO Leaders
- CTOs & Engineering Heads

Don't just track your sprint. Command it.

Perfect For Organizations That

- Run multiple Scrum teams
- Use Jira Cloud
- Deliver under tight release timelines
- Need predictable sprint execution
- Want greater engineering visibility without additional reporting overhead

THE SPRINT OPS ADVANTAGE

TRADITIONAL JIRA DASHBOARDS	SPRINT OPS CENTER
Shows project status	Shows sprint health
Reports completed work	Detects active execution risks
Retrospective insights	Real-time intervention
Multiple dashboards	One operational command center

Ready to Transform SPRINT EXECUTION?

Experience proactive sprint management inside Jira Cloud.
